Examiner, Art Unit 1627

Examiner's Amendment

An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The amendments are as follows:

- 1) Claim 17, line 9, **replace** "glycosydic with "glycosidic".

Reasons for Allowance

The claimed invention of "a pharmaceutical oral dosage unit containing at least 10 μ g of an estrogen and at least 10 μ g of a steroid selected from the group consisting of 15-hydroxytestosterones, precursors thereof, mixtures thereof and precursors of said mixtures; and a pharmaceutically acceptable excipient, wherein said oral dosage unit is selected from the group consisting of a tablet, a capsule and a chachet, wherein the precursors of the hydroxytestosterones are derivatives of the hydroxytestosterones wherein a hydrogen atom of at least one hydroxyl group has been substituted by an acyl radical of a hydrocarbon carboxylic, sulfonic or sulfamic acid of 1-25 carbon atoms; tetrahydrofuranyl; tetrahydropyranal; or a straight or branched chain glycosidic residue containing 1-20 glycosidic units per residue, and wherein the pharmaceutical oral dosage unit is orally active" is novel and non-obvious. The closest prior art is due to being unpatentable over (Lardy (WO 01/23405). Lardy teaches a generic formula which

Art Unit: 1627

encompasses 15-hydroxytestosterones, however the reference does not specifically teach 15- hydroxytestosterones. Lardy's formula 1 provides a very large number of possible compounds to try. Furthermore, according to Lardy, the majority of the compounds are expected to have little androgenic activity. Therefore, Lardy does not provide a known and finite number of compounds. Lardy provides a broad selection of compounds with no expectation of success that any particular compound will have sufficient androgenic activity. Furthermore, Lardy casually suggests that all compounds may be orally administered, however only a small fraction were expected to be orally active and 15-hydroxytestosterone was not one of them.

Thus the claimed invention is rendered neither anticipated nor obvious.

Conclusion

Claims 17, 20, 21, 25-28, 30, 32, and 33 are allowed.
